DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3, 6 and 8 rejected under 35 U.S.C. 102(e) as being anticipate by US 6560166 to Saito et al. [hereinafter Saito].

Regarding claim 1: Saito discloses an electronic equipment system comprising a radio a remote controller (col. 4, lines23-25) for transmitting a remote control signal containing a command signal and a time data signal subsequent to the command signal; and an electronic equipment (1) for receiving the remote control signal to correct time information, said electronic equipment (1) comprising determining means for determining whether to carry out time correction based on state of receiving the command signal (col. 4, lines 49-60).

With respect to claim 6: the method steps will be met during the normal operation of the apparatus stated above.

Regarding claim 3: Saito discloses the electronic equipment system according to Claim 1, wherein said electronic equipment has a first mode of carrying out no time correction and a second mode of carrying out the time correction, and said determining means determines, when the first mode is active, not to carry out the time correction, when the second mode active,

Art Unit: 2841

whether to carry out the time correction based on the state of receiving the command signal (col. 4, lines 49-60).

With respect to claim 8: the method steps will be met during the normal operation of the apparatus stated above.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5 and 10 rejected under 35 U.S.C. 103(a) as being unpatentable over Saito in view of US 6999380 to Yamamoto.

Regarding claim 5: Yamamoto teaches a camera device comprising a time correction feature. Therefore, it would have been obvious to a person having ordinary skill in the art at the time the invention was made to add the camera device of Yamamoto, to the device of Saito, in order to get a video image of an employee.

With respect to claim 10: the method steps will be met during the normal operation of the apparatus stated above.

Allowable Subject Matter

5. Claims 2, 4, 7 and 9 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim

Art Unit: 2841

and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited in the PTO-892 disclose related devices. US 206/0034159 to Sano and US 5,600,711 to Yuen disclose a time data transmitting system
